IF YOU ARE RUNNING

📍 **Step 1 — Go Inside Project Folder**

cd algo-finance

📍 **Step 2 — Install Dependencies (if not already)**

npm install

📍 **Step 3 — Start Development Server**

npm run dev

You will see something like:

VITE vX.X.X ready in 500ms

➜ Local: http://localhost:5173/

📍 **Step 4 — Open Browser**

Open:

http://localhost:5173/

✅ Your project will run.

❗ **If You Get Error: "Port already in use"**

Run:

npm run dev -- --port 5174

Or kill existing process.

📂 **If You Want Clean Restart**

```
rm -rf node_modules
rm package-lock.json
npm install
npm run dev
```

(Windows PowerShell)

```
rd /s /q node_modules
del package-lock.json
```

```
npm install
npm run dev
```

🧠 If Backend Is Also Present

If you later create:

backend/

Then:

Terminal 1 (Frontend)

```
cd algo-finance
npm run dev
```

Terminal 2 (Backend)

```
cd backend
npm install
npm run dev
```

🟢 How To Check If Everything Is Working

- ✅ Landing page loads
- ✅ Routing works
- ✅ Sidebar opens
- ✅ Charts render
- ✅ No red error in console

Open browser console:

F12 → Console

No red errors = good.
